Contents xiii

**I. Vortices and neutron stars**

Dynamics of vortices in neutron stars
G. Baym, R.I. Epstein and B. Link 1

Roles of $^3P_2$ superfluid in neutron stars with a pion-condensed core
R. Tamagaki 13

Analogies and differences between neutron and boson stars studied with catastrophe theory
F.V. Kusmartsev and F.E. Schunck 24

**II. Anyons, analogies with cosmology**

Self-consistent Hartree description of anyons
A.L. Fetter 35

Vortices in helium 3: an analog to cosmic strings in the early universe
R.H. Brandenberger 42

Massless modes on cosmic strings
M. Hindmarsh 47

Coarsening dynamics in nematic liquid crystals
B. Yurke, A.N. Pargellis, I. Chuang and N. Turok 56

**III. Vortex nucleation**

Experiments on quantized circulation in superfluid $^3$He
J.C. Davis, J.D. Close, R. Zieve and R.E. Packard 73

Quantum nucleation of vorticity
R.L. Davis 76

Observations on vortex formation in superfluid $^3$He
P.J. Hakonen 83

Gap anisotropy, vortex cluster, and nucleation of vortices in rotating $^3$He-B
Y. Kondo, J.S. Korhonen, Ü. Parts, M. Krusius, O.V. Lounasmaa and A.D. Gongadze 90

**IV. Hydrodynamics**

Two approaches to hydrodynamics of rotating superfluids: Slow and fast rotations
A.F. Andreev 102

What can we learn of vortex dynamics from $^3$He investigations
E.B. Sonin 106

**V. New condensed-matter systems**

Supersolid $^4$He: an overview of past searches and future possibilities
M.W. Meisel 121

Magnetic compression of atomic hydrogen to high densities
E. Tjukanov, A.Ya. Katunin, A.I. Safonov, P. Arvela, M. Karhunen, B.G. Lazarev, G.V. Shlyapnikov, I.I. Lukashevich and S. Jaakkola 129

Superfluidity of $^3$He in dilute $^3$He–$^4$He mixtures
E. Østgaard and E.P. Bashkin 134

**VI. Textural effects in $^3$He**

Dynamics of textures in $^3$He-B
I.A. Fomin and E.V. Poddyakova 141

Textural phase transitions in rotating $^3$He-B between co-axial cylinders
A.D. Gongadze and S.V. Mikeladze 149

Planar boojums in rotating vortex-free $^3$He-B in a tilted magnetic field
A.D. Gongadze and S.V. Mikeladze 154

**VII. Surfaces and interfaces**

The moving A–B phase boundary of superfluid $^3$He
N. Schopohl and D. Waxman 158

Singularities in rotating $^3$He
G.E. Volovik 160

Some considerations on the equilibrium A–B interface
E.V. Thuneberg 168

Diffusely scattering surface in superfluid $^3$He
E.V. Thuneberg, M. Fogelström and J. Kurkijärvi 176

**VIII. Spin dynamics of $^3$He**

Anomalous magnetic relaxation in normal $^3$He at low temperatures
Yu.M. Bun'kov, V.V. Dmitriev, Yu.M. Mukharsky and D.A. Sergatskov 181

Principles of HPD NMR spectroscopy of $^3$He-B
Yu.M. Bun'kov 187

Low frequency oscillations of the homogeneously precessing domain in $^3$He-B
Yu.M. Bun'kov, V.V. Dmitriev and Yu.M. Mukharsky 196

Spin diffusion in superfluid $^3$He-B
A.V. Markelov and Yu.M. Mukharsky 202

**IX. Sound experiments and theory**

Five-fold splitting of the squashing collective mode and the pair-breaking edge of superfluid $^3$He-B in a magnetic field
R. Movshovich and D.M. Lee 206

Nonlinear acoustic effects in superfluid $^3$He-B
R.H. McKenzie and J.A. Sauls 219

Experimental investigation of two-phonon absorption by the real squashing mode in superfluid $^3$He-B
J.P. Pekola, K. Torizuka, A.J. Manninen, H. Alles and O.V. Lounasmaa 238

Ultrasonic investigation of $^3$He-A vortices in low magnetic fields
K. Torizuka, J.P. Pekola and A.J. Manninen 244

Is ultrasound a suitable probe to determine the structure of the vortex lattice in $^3$He-A?
J.P. Pekola, G.M. Kira, A.J. Manninen and B.N. Kiviladze 262

**X. Questions for the A phase?**

Is the A phase really "the A phase"?
C.M. Gould 266

What happens with the doubly quantized vortex in $^3$He-A at the $A_2 \rightarrow A_1$ phase transition
G.A. Kharadze, B.N. Kiviladze and G.E. Volovik 274

Lattice of spin-1/2 solitons in superfluid $^3$He-a films
A.M.J. Schakel 280

**XI. Quasiparticle interactions**

Theory of pair breaking by vibrating macroscopic objects in superfluid $^3$He
C.J. Lambert 294

Andreev exclusion of bulk state quasiparticles from a surface in $^3$He-A at the low temperature limit: implications for transport properties
S.N. Fisher, A.M. Guénault, C.J. Kennedy and G.R. Pickett 304

**XII. Phase slippage in superfluid $^3$He**

Phase slippage in superfluid $^3$He-B
E. Varoquaux, O. Avenel, G. Ihas and R. Salmelin 309

Computer simulations of quantum phase slippage in superfluid $^3$He
P.I. Soininen, N.B. Kopnin and M.M. Salomaa 318

**XIII. Magnetic-field effects**

Liquid $^3$He in a very high magnetic field: recent developments
R. Jochemsen 331

The superfluid energy gap in $^3$He-B as a function of magnetic field in the low temperature limit
S.N. Fisher, A.M. Guénault, C.J. Kennedy and G.R. Pickett 336

**XIV. Novel experimental techniques**

Vibrations of a magnetic microsphere levitated above a superconductor: a high-$Q$ oscillator for studies of vorticity in superconductors and superfluids
P. Eizinger, W. Schoepe, K. Gloos, J.T. Simola and J.T. Tuoriniemi 340

Differences and similarities between the SQUID and a possible superfluid helium analogue
S. Vitale, M. Cerdonio and M. Bonaldi 347

A prestudy of optical imaging on superfluid $^3$He
A.J. Manninen, H. Alles, A.V. Babkin and J.P. Pekola 352
